

Summary for Vedios

1- if(condition){

//true; }

else if(condition){

// true;}

else{

//code false

}

2-Swich Case

// I cannot use it with logical operators

switch(value) {

Case 1:

//code

break;

Case 2:

//code

Default:

//code false

break;

3- Assert and Ternary operator

assert(condition,message){

// if the condition false the error message will appear

}

Ternary operator

Var value=(condition) ? //condition true: //condition false ;

4- Try{

//condition true;

}

Catch(e){

//condition false ;

}

5-for(start ;condition;increment or dectement){

//code ;}

6- while loop

// start

```
while(condition){
```

```
}
```

7- do while //The code is execute at least once

```
do{
```

```
//code
```

```
}while(condition){
```

```
//code
```

```
}
```
